Nutra-C®

The Most Powerful and Neutral Vitamin C Powder

MADE IN USA | NSF GMP Registered Dietary Supplements | KOSHER | HALAL

A Powerful non-acidic Vitamin C with High BioAvailability for a variety of applications

Nutra-C®, a unique form of non-acidic Vitamin C, is made using a specific water-based manufacturing process which results in a pH neutral product that contains naturally occurring Vitamin C metabolites.

These metabolites, namely calcium and magnesium salts of threonic acid, activate the Vitamin C molecules, making it easier for the body to transport them from cell to cell delivering numerous health benefits. In addition, Nutra-C®, is an efficient source of chelated calcium and magnesium.

With the presence of these chelated minerals, mainly calcium and magnesium ascorbate, Nutra-C® is ionized completely and is 100% bio-available from the moment of consumption.

From a trial study, Nutra-C® has been shown to help increase Vitamin C intake and retention of Vitamin C by the cells. This vitamin C ingredient is most effective in terms of absorption and retention.

Nutra-C® Benefits:

- High Bioavailability
- Improved Retention
- Non-Acidic & Gentle on the Stomach
- Quick Absorption and Powerful Immune Support
- Nutra-C® can be used for a variety of applications such as: Tablets, capsules, softgels, gummies, powder mixes, lotions, creams, and more!
